## Essential Information

### What To Take

We recommend wearing walking boots on all our walks, as these provide the best ankle support and grip. Approach shoes offer appropriate levels of grip and are fine if you're comfortable with and used to walking without the ankle support. Walking socks suitable for warm weather – major sock manufacturers such as Bridgedale make socks specifically designed for warm weather – just ensure that your footwear fits correctly if you're used to wearing thicker socks. Windproof/waterproof jacket (with hood) and waterproof trousers – these are essential at all times of the year. Shorts and T-shirts - lightweight wicking materials are best. Warm fleece & trousers Sun protection – hat, sunglasses and sun cream.

**Clothing:** Fleece or other purpose designed synthetic tops give good lightweight insulation and nylon or cotton trousers can provide unrestricted movement. A layering system is better than one thick top. Lightweight hat and gloves

### Additional Equipment For Walking

**Rucksack:** this needs to be large enough to carry your picnic lunch, drink, waterproofs and spare clothing. A size of 25-30 litres is probably best. A waterproof liner as well as a rucksack cover will keep the contents dry should you be unlucky enough to encounter any rain.

**Water bottle:** a size of at least 2 litres is recommended.

**Please take a plastic box with personal cutlery for salad/crudities given with packed lunch and plastic food bags**

**Sun protection:** high factor sun screen and lip salve Personal First Aid Kit: containing for example plasters, insect repellent, antiseptic wipes, painkillers, blister kit, tape and personal medication.

**Spare food:** Leaders cannot carry emergency food for the whole party. As this walk crosses remote areas it is essential that you take some high energy food. Energy bars, nuts, dried fruit, chocolate etc are not included in your picnic so please take supplies, or pick up some enroute.

Camera/binoculars – your choice. Trekking poles - many people find these aid balance and take some of the strain off their knees during steeper descents
